JOB Objective

To be able to cultivate my potentials and skills in the field of proficiency and contribute to the achievement of the organization's vision and missions. Wish to be a part of a dynamic and corporate environment were opportunities for growth and career development.

Summary

▷ I am a Web Developer with about 3 years of experience in developing user interfaces and engaged in developing Web API.
▷ I am a fast learner and a hard worker who is proficient in different frameworks and other programming languages.

Relevant Experience

▷ **Software/Web Developer @ Utalk Philippines**

Sept. 2019 - Present // Baguio, Luzon, Philippines

Maintaining Systems and services to lower the rate of system errors or bugs. To manage and create front-end and back-end codes/programs, we are also engaged in different kinds of frameworks and tools like VueJs, AngularJs, Codeigniter, Lumen/Laravel, and Ruby on Rails. For the Database, we manage MySQL and Mongo Database.

▷ **Web Developer @ Dapayan Eatery La Trinidad**

Aug. 2018 - May 2019 // La Trinidad, Luzon, Philippines

Participated as an author and a project developer for the Ordering Management System for the restaurant. We used PHP, JavaScript, HTML, CSS, and MySQL to build the web app.

▷ **Designer and Web Programmer @ iLearn Skills Development Academy**

Aug. 2018 - Dec. 2018 // La Trinidad, Luzon, Philippines

Being a part of a work that focuses on designs, I have been creating designs for simple magazines using Photoshop and Illustrator. Engaged in Video Editing using Adobe Premiere. Engaged in web programming algorithms using JavaScript and PHP.
